## THE SUMMER SESSIONS

### UNIVERSITY OF MARYLAND COLLEGE PARK CAMPUS 1974

## THE SUMMER SESSIONS

The Summer Sessions at the University of Maryland make available educational opportunities for undergraduate and graduate students who wish to fulfill degree requirements in the shortest length of time, who wish to take courses that they cannot fit into their academic year schedules, or who need to make up deficiencies or test their ability to do college work. The Summer Sessions also seek to broaden and vary the instructional program by appointing outstanding visiting lecturers and to stimulate students' interests by providing an academic environment which includes a diversified cultural and recreational program. To meet specific educational needs, the Summer Sessions offer workshops and institutes for school personnel and other groups.

The extensive and varied course offerings, lectures, special institutes, and workshops are planned jointly by the Department Chairmen, Deans, Divisional Chairmen, and the Administrative Dean for Summer Programs. The courses offered are regular University courses taught by members of the faculty or visiting lecturers of outstanding ability.

## SUMMER CULTURAL AND RECREATIONAL ACTIVITIES

As an integral part of its summer program, the University offers to enrolled students an outstanding cultural and recreational program.

The 1974 Summer Fine Arts Festival will offer Campus and community a series of programs in art, dance, drama, film and music. The 1974 program will place special emphasis upon dance and music. Outstanding performers in these media will appear on the College Park Campus. All events are scheduled in the air-conditioned J. Millard Tawes Fine Arts Center. A complete calendar of events will be distributed at registration.

The 1974 Festival promises to be a most exciting one and continues the tradition of offering the summer community a culturally enriched atmosphere in which academic studies may be pleasantly pursued.

The Summer Recreation Program offers a wide variety of leisure time activities for the Campus community. The program includes such activities as recreational swimming, an art workshop, bridge, chess, and bowling tournaments; softball leagues; and a variety of others. The Summer Recreation Office also assists the promotion and coordination of programs offered by other units. Special services such as social hours or special swimming sessions may be requested by any group. Possession of the University of Maryland Summer Activity Card entitles the bearer to all the recreation opportunities of the University as determined by University Policy. A group fee may be charged to cover unusual expenses.

## STUDENT HEALTH

The University Infirmary, located on the Campus near the Student Union, provides medical service for students enrolled for summer session courses on the College Park Campus. Students who are ill should report promptly to the University Infirmary. Serious emergencies may be reported by phone to Ext. 3444, or if transportation for emergency is needed, call 3555 on Campus phone or 454-3555 on a pay phone. Doctors' office hours are: weekdays, 8:00 a.m. to 5:00 p.m.; weekends, 9:00 a.m. to 11:00 a.m.. Nurses are on duty 24 hours each day, and doctors are on call for serious conditions after regular hours.

## UMPORIUM—UNIVERSITY BOOKSTORE

The Umporium, University Bookstore, is located in the basement of the Student Union Building. Members of the University Community may purchase at reasonable rates textbooks, classroom materials, photographic materials, and many novelties, notions and gifts.

## AUTOMOBILE REGISTRATION

All students are required to register their automobiles at the time of registration for classes. A student must bring his operator's license and the state or District of Columbia automobile registration card containing the automobile tag number. Parking stickers for automobiles previously registered for the 1973-74 academic year will be honored for the 1974 summer session. For automobiles operated by new students or non-registered cars operated by continuing students, there will be a registration fee (See Tuition and Fees). Vehicles must be registered by the legal operator only.

For use of students, staff members, and employees, several parking lots are provided. Students may park registered cars in lots 1, 2, 3, 4, 7 and 11. All other lots are reserved for faculty and staff members. University Regulations forbid the parking of cars on any Campus road or fire lane. These regulations are enforced by the Campus Office of Public Safety.

## LIBRARIES

Libraries of the University are the general University Library (the Theodore R. McKeldin Library), the Undergraduate Library, the Architecture Library, the Engineering and Physical Sciences Library, and the Chemistry Library. The libraries have a total book collection of over 1,300,000 cataloged volumes and currently receive more than 15,000 subscriptions to periodicals and newspapers. In addition, the libraries contain over 730,000 microtexts, over 200,000 U.S. government and United Nations documents, and thousands of phonograph records, maps, film strips, slides, and technical reports. Bibliographical facilities include card catalogs of the British Museum, Bibliothèque Nationale, and Library of Congress, trade bibliographies of foreign countries and special bibliographies of subject fields. Study carrels in the Theodore R. McKeldin Library are available to faculty members and graduate students whose study and research require these facilities. Lockers are available for assignment to graduate students. Facilities for reading microtext materials, for typing, and for copying are also provided. Interlibrary loan service is available.

## RESEARCH FACILITIES

The research programs at the University derive their existence and vigor from a faculty comprised of internationally recognized scholars and scientists. It is an advantage for undergraduate students to be aware of the University's research facilities as they plan their program.

In addition to fine library resources and the usual laboratory facilities for undergraduate studies, the University has developed outstanding opportunities for research in the biological, physical, and social sciences. Among the exceptional facilities are the Institute for Child Study; the Natural Resources Institute; a Computer Science Center; a laboratory for basic behavioral research on animals; Van de Graaf accelerators; a training nuclear reactor; a full-scale, low-velocity wind tunnel; a psychopharmacology laboratory; and laboratory models for meteorological phenomena. Collaborative arrangements with many nearby government agencies permit qualified University students and faculty to utilize their research facilities. The University owns and operates the world's longest radio telescope, located in California. A 160 MeV cyclotron for research in nuclear studies is located on the College Park Campus.

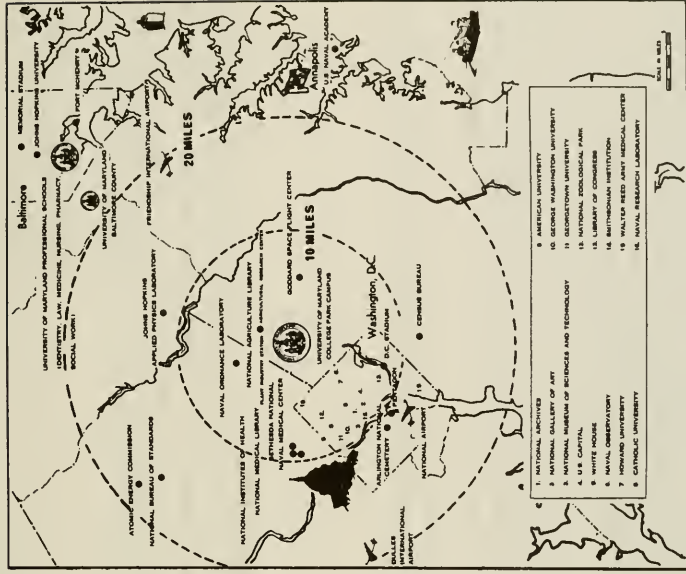

Investigation in agriculture is an important aspect of University research. University farms total more than 2,000 acres. Breeding, selection in farm crops, and soil research are a part of the program. Work in these areas is augmented by X-ray equipment and an electron microscope.

## OTHER AREA RESOURCES

The College Park Campus is in a region which is unusually rich in libraries, research facilities, museums, galleries and cultural centers as illustrated by the map.

# ACADEMIC REGULATIONS

## GENERAL UNIVERSITY REQUIREMENTS

In order to provide educational breadth for all students, there has been established the General University Requirements. These requirements consist of 30 semester hours of credit distributed among the three areas listed below. (For an exception to this regulation, see the Bachelor of General Studies Program.) At least 6 hours must be taken in each area. At least 9 of the 30 hours must be taken at the 300 level or above. None of the 30 hours may be counted toward published departmental, college or divisional requirements for a degree.

Area A. 6–12 hours elected in the Divisions of Agricultural and Life Sciences; Mathematical and Physical Sciences and Engineering;

Area B. 6–12 hours in the Divisions of Behavioral and Social Sciences; Human and Community Resources.

Area C. 6–12 hours in the Division of Arts and Humanities.

In meeting these area requirements, students may choose from among any undergraduate courses for which they are qualified. Students are urged to consult academic advisors for guidance in determining which courses in each area best fit individual needs and interests.

Demonstration of competency in English composition. Unless the student has been exempted from English composition, at least one course in this subject will be required. Exemption is granted if the student earns an acceptable score on the Illinois Rhetoric Test administered by the Department of English (score announced annually), or a score of 2 on the English Advanced Placement Test, or by satisfactory completion of a similar course at another institution. Students taking a course to satisfy this requirement may apply the credits toward the 30-hour General University Requirement but may not count these credits toward the satisfaction of the minimum 6-hour requirement in any of the three designated areas. Credit for such a course may be in addition to the 12-hour maximum in any area.

Students who entered the University prior to June, 1973 have the option of completing requirements under the former General Education Program rather than the new General University Requirements. Each student is responsible for making certain that the various categories of either set of requirements have been satisfied prior to certification for the degree. Assistance and advice may be obtained from the academic advisor, the Offices of the Dean for Undergraduate Studies, or the Administrative Dean for Summer Programs.

# ACADEMIC INFORMATION

## ACADEMIC CREDIT

The information given below is taken from Academic Regulations, a complete statement of which may be found in the Undergraduate and Graduate Catalogs.

The semester hour is the unit of credit. During the summer session a typical 3 credit hour course meets five times a week for six weeks and requires daily preparation. Each class period is 80 minutes in length.

Students who are matriculated as candidates for degrees will be given credit toward the appropriate degree for satisfactory completion of summer courses. Each student is responsible for the determination of applicability of courses selected to the degree program and is urged to consult an academic advisor.

All students enrolled for credit will receive an official grade for each course.

## MARKING SYSTEM

Grading methods are indicated for each course listed in the class schedule. The following symbols are used on the student's permanent record for all courses in which the student is enrolled after the initial registration and schedule adjustment period: A, B, C, D, F, I, P, S, and W. For undergraduate students the mark A denotes excellent mastery; B good mastery; C acceptable mastery; D marginal performance which does not represent satisfactory progress toward the degree. The mark F denotes failure. The mark I (incomplete) is an exceptional grade given only when the student has done satisfactory work but is unable to complete all requirements of the course due to circumstances beyond his control. In order to be changed to a passing mark the work must be completed before the course is offered again. The mark W denotes that the student withdrew from a course in which the student was enrolled at the end of the schedule adjustment period. The W is entered on the student's permanent record but is not used in a computation of the academic average.

For graduate students, the following symbols are used A, B, C, and S constituting superior to passing scholarship; D and F, reflecting failure. The pass/fail option is not available to graduate students.

## PASS/FAIL OPTION

Undergraduate students who have completed 15 or more credit hours on the College Park Campus and have a cumulative average of at least 2.0 may register for one course per summer term on a pass/fail basis if the course offers the pass/fail grading option. No more than 20 percent of the credits offered toward a degree may be taken on the pass/fail basis. A complete statement of regulations concerning the pass/fail option is available in the Undergraduate Catalog.

## SUMMER GRADUATE STUDY

The Summer School offers a large number of courses at the graduate level particularly in the field of Education for teachers.

A student desiring graduate credit, either as a degree seeker or on a nondegree basis, must have been admitted to the University of Maryland Graduate School. The deadline for application for graduate study for either of the two summer sessions is May 1. This deadline does not apply, however, to visiting graduate students who may apply at any time prior to registration as specified in the next paragraph.

Visiting graduate students from another institution may be admitted in a visitor graduate status by simply completing a graduate application form at the Graduate School prior to registration and submitting it, together with the \$15.00 application fee and a letter signed by the graduate dean at the home institution. The letter must state that the applicant is in good standing in his graduate study. Admission will be limited to either or both of the two summer sessions and will terminate at the close of the 1974 summer sessions. An application blank is available at the back of this catalog. Transfer of the completed credit to the home institution can be effected by requesting an official transcript from the Office of Admissions and Registrations.

A student wishing to enroll in courses numbered 600 or above must be in an admitted graduate status at the University of Maryland.

Graduate students who receive faculty guidance and wish to use the research facilities of the University during the summer must register for an appropriate number of credits. For more complete information, contact the Dean for Graduate Studies and Research. Call 454-5428.

## SPECIAL PROGRAMS WORKSHOPS, INSTITUTES AND OTHER SPECIAL OFFERINGS

During the summer months the Summer Sessions offers a number of special educational programs. These programs differ from the regular course offerings in instructional format and frequently in duration. The content of these special programs is usually of interest to a select audience but may also be of general interest to the student or community resident. The admission procedures are the same as those for the regular courses. Special registration arrangements will be made for certain workshops. Details regarding registration may be obtained from program directors. The usual fee schedule applies and there may be added expense to the student as noted.

## UNIVERSITY POLICY STATEMENT

The provisions of this publication are not to be regarded as an irrevocable contract between the student and the University of Maryland. Changes are effected from time to time in the general regulations and in the academic requirements. There are established procedures for making changes, procedures which protect the institution's integrity and the individual student's interests and welfare. A curriculum or graduation requirement, when altered, is not made retroactive unless the alteration is to the student's advantage and can be accommodated within the span of years normally required for graduation. When the actions of a student are judged by competent authority, using established procedure, to be detrimental to the interests of the University community, that person may be required to withdraw from the University.

The University of Maryland, in all its branches and divisions, subscribes to a policy of equal educational and employment opportunity for people of every race, creed, ethnic origin and sex.
